(1) Our School

School Vision and Mission:

It is the vision of the school to provide equal opportunities for quality and holistic Christian Education for our students. The school's mission is to provide our students with a Christian education that develops the whole person in the following areas: moral, intellectual, physical, social, aesthetic and spiritual; to instil in our girls a spirit of public service, and to build a firm foundation in both Chinese and English.

School Motto

In strength and grace we stand united
In faith and love we are committed

School Background

Heep Yunn School is an Anglican (Sheng Kung Hui) school established in 1936 when two former C.M.S. (Church Missionary Society) institutions, namely Fairlea (1886) and Victoria Home & Orphanage (1887), were joined together. Hence, the name "Heep Yunn" means "United Grace".

The founders of Heep Yunn were committed to bringing education to young women and orphans in answer to the call of duty at a time of economic instability and threat of war in 1930's Hong Kong. They believed in empowering students to bring enlightenment to our nation and support to our people. To this day, the school abides by its dedication to serve our fellow men in the love of Christ.

(2) Achievements and Reflection on Major Concerns

3-Year Development Goal: To cater for learner diversity through e-learning.

Annual Major Concern/Priority Task 1: To promote flexible and self-paced learning by providing diversified e-learning materials.

Achievements

In spite of the prevalence of the COVID-19 pandemic, our school's learning and teaching had not been ceased with the provision of diversified e-learning materials by all academic departments. The practice of offering assorted e-learning materials was prevailing as shown in results of the end-of-year school-based survey, with 92.98% of teachers and 92.33% of students affirmed that "I have/my teachers have provided diversified e-learning materials to facilitate students' learning." The survey also revealed the benefits brought by the e-learning strategy, with 92.98% of teachers and 86.67% of students agreed that "with the e-learning materials, students are/ I am able to learn at their/my own pace", while 96.49% of teachers and 88.93% of students agreed that "the provision of e-learning materials has promoted flexibility to students' learning, allowing students/me to learn beyond the classroom any time". The autonomy and flexibility granted to students had duly catered for the diverse needs of them.

Departmental efforts to offer a wide varieties of e-learning materials were highly commendable. Below are some highlights of our achievements: The BAFS Department had used iPad apps "Explain Everything" and "Goodnotes" to aid students' learning. Important concepts and question demonstrations were recorded in the video form and were categorised into different levels of difficulty. Students could revisit the videos after lessons for self-paced learning according to their actual needs. Online multiple choices (MC) past paper questions by topics and supplementary learning materials were uploaded to the Google Classroom for students to do at home. Students could obtain instant feedback from the MC question bank. Students' feedback to these measures was overwhelmingly positive, with the score of questionnaire being 4 of out of 5. Student found the measure exceptionally useful especially during the school suspension period. With the initiative, the department witnessed the rise in percentage of students attaining Level 5 or above from around 30% to 44.9% this year, which was a sturdy proof of the effectiveness. For the Chemistry Department, teaching videos, animations and experiment videos were uploaded to online platforms such as Google Classroom, YouTube or Edpuzzle. Some challenging concepts and questions were embedded in the videos to cater to the needs of the academically stronger students. From the results of the questionnaire, 81% (F.4), 89% (F.5) and 90% (F.6) of the students found the e-learning materials useful. The Department had also joined the Chemist Online Self Study Scheme (COSAS) to stretch the potential of students. While the Scheme was still on-going, 44 students gained different levels of awards as in August, 2022. The percentage of students attaining Level 5 or above in HKDSE was 86.7%. The promising results signified the success of the e-learning strategy.

Towards the end of the school development cycle (2018-2022), a year-end survey was also conducted in March to July 2022 to evaluate the effectiveness of the school development goals. As many as 93.2% of students and 91.2% teachers affirmed that their teachers/ they had adopted more e-learning to cater to learner diversity in the past four years. Besides, 91.2% of teachers expressed that they had extended students' learning by addressing their learning difficulties and offering more challenging tasks to them during the aforementioned period. The strategies adopted by teachers had been beneficial to the students. With 93.1% of students concurring with the fact that they learn better with the aid of e-learning, indicating the boost of learning and teaching effectiveness.

Reflection

Our School remains a vibrant learning community despite the frequent suspension of face-to-face lessons under the pandemic with the aid of the e-learning strategy. The whole school approach to cater for learner diversity through e-learning was proven to be successful, with the predominance of teachers being well acquainted with various e-learning strategies and the majority of students being self-motivated for tasks offered beyond classrooms. The flexibility provided for students for self-paced study had effectively deepened and broadened their learning. As a matter of facts, students' responsibility and accountability for study had also been enhanced. In closing, this major concern/ development goal was attained to a large extent and would be incorporated into our routine under the new normal.

3-Year Development Goal: To enhance the effectiveness of small group teaching in the core subjects.
Annual Major Concern/Priority Task 2: To adopt apt and differentiated measures for different ability groups.

Achievements
<p>This year the four core subjects saw the disruption of small group teaching as face-to face lessons were suspended for a period of time. However, the four core subject departments had attempted to adopt apt and differentiated measures for different ability groups through various means.</p> <p>With the support of the Education Bureau, the Chinese Department had designed tiered materials for two topics (Reflection on life 感悟生活) and (Landscape poems and paintings 詩畫山水) for Form Three students. A total of five common lesson preparation and informal meetings were held to formulate small group teaching pedagogies for different ability groups. A total of four lesson observations and post-observation discussions were held to enhance the learning and teaching effectiveness. About 80% of students found that the tiered materials offered could aid them in setting their own study plans, and enabled them to learn through their own learning styles and habits. The English Department continued with the implementation of process writing in Forms One and Two with the aim to increase student participation. Not only could the process writing facilitate teachers to give individualised feedback to different ability groups to improve teaching and learning, it also encouraged peer learning. From teachers' feedback based on students' work, process writing could help students enrich their ideas or enhance their language. Besides, to encourage online discussions on set literary texts and to provide questions and tasks of different levels of difficulty to encourage students to realise their potential, English Literature teachers designed core and extension questions/tasks and provided feedback to responses for senior form students. There were shared Google files to conduct sharing of knowledge and learning experience. About 84% of students agreed that the questions and tasks helped them consolidate their learning and assisted them in attaining better performance in assessments with timely feedback from teachers. As for the Mathematics Department, several meetings were held among the panel members. Four senior/ experienced teachers opened their classroom for the novice teachers. Debriefings were conducted afterwards to discuss suitable and differentiated measures for different ability groups of students. Whereas for Liberal Studies, enrichment notes were produced to enhance students' exposure for higher ability groups. However, in light of the advice given by the Quality Assurance Division of the Education Bureau, the department would use textbooks approved by the Education Bureau in the future in order to ensure strict adherence to the curriculum guidelines for the subject Citizenship and Social Development.</p> <p>The measures adopted by the four core departments were found to be effective. According to the school-based survey for the four core subjects conducted in March to July, 93.94% of teachers and 85.79% of students agreed that "I/ My teachers have provided apt learning experiences to students that suit their needs". A total of 93.94% of teachers and 82.01% of students affirmed that "I/ My teachers have offered extended tasks to stretch students' potential"; while 97% of teachers and 86.67% of students acknowledged that "I/ My teachers have provided assignments with different levels of difficulty", indicating that apt learning experience and assessments were provided for students of varied abilities for the four core subjects.</p> <p>The efforts put to lift up the effectiveness of small group teaching in the core subjects throughout the past four years had reaped positive results. As shown in the year-end survey for the school</p>

development goals, 96.97% of teachers and 84.28% of students accredited the enhancement of learning environment of the small group learning rooms and 96.97% of teachers and 85.16% of students recognised the employment of apt pedagogies to facilitate small group learning, demonstrating the augmentation in both “hardware” and “software” for small group teaching. Not surprisingly, both teachers (99%) and students (88%) concluded that they were able to learn better in small group teaching in the past four years.

Reflection

Notwithstanding the hiccups caused by the COVID-19 pandemic, both our teachers and students persisted in adding value in the four core subjects in their endeavours. Manifested in various surveys, the learning and teaching effectiveness in small group teaching had been raised steadily, showing the fulfilment of the major concern and development goal. The resourcefulness and adaptability of the team was to be applauded. As the face-to-face lessons begin to resume, the experience crystalised by the four core subjects in the past four years would hopefully bring the learning and teaching to the next altitude.

3-Year Development Goal: To promote the social well-being of students.

Annual Major Concern/ Priority Task 3: To foster positive affectivity among students.

Achievements
<p>The Counselling Committee continued to take the lead in fostering positive affectivity among students. For whole school mass programmes, with the aims to promote a comprehensive mental well-being program and to foster positive affectivity among students through mutual encouragement among students, the School had participated in the Expressive Art Programme organised by the Christian Family Service Centre. Through a series of activities including in-class activities, setting up open studios, arts booths etc., students were encouraged to express their feelings through arts in schools. With the aid of the expressive art therapists and social workers, many students voiced that their stress had been relieved. Over 90% of respondents expressed that the workshops helped them build a positive and proactive attitude, as well as live towards a healthy lifestyle.</p> <p>To address the diverse needs of students of different stages, form-based programmes were arranged. For Form Four students, the Psycho-education class programme and Live for Life Talk were organised. Through listening to the stories of life warriors, students developed resilience towards adversity, as well as a sense of respect for others. Their self-awareness towards their own potential had been unlocked. They expressed that they learned to think positively and their self-confidence was built. All students agreed unanimously that the life stories encouraged them to adopt a more positive attitude toward life challenges, and near 90% of them thought the activity helped create a caring atmosphere in the School. As for Form Five, through the self-appreciation workshop for careers planning, students learned to appreciate each other and their strong points and ability were affirmed. Over 80% of respondents agreed that the activity enabled them to understand their strengths and increase their readiness for the future. Other regular form-based mass programmes with preventive purposes, such as the “Form One Induction Programme”, “Big Sister Scheme”, “Stress Management Programmes for Forms Three to Six students” and sex education talks, were also organised. Students who required more attention were identified and tailored-made activities were arranged for them.</p> <p>Besides the pastoral care and work of the Counselling Committee, the School had provided ample opportunities for students to reconnect and build positive value through an array of post-examination life-wide learning activities, including the internal Mini Fun Fair and local Personal Growth Programmes for all forms. Positive values were also cultivated through spiritual education, which included the 85th anniversary Thanksgiving Gathering and the Christian summer retreat day camp held in August.</p> <p>The fruits of the above programmes were shown in the year-end survey. Over 90 % of teachers and near 80% of students were in support of the statement that “despite the pandemic, the school has organised a wide range of activities to foster positive affectivity among the students/ us.” Over 70% of students admitted that they were enthusiastic about going to school and near 80% of them felt that they were still engaged in the school despite the pandemic. Over 90% of students expressed that they were grateful for their teachers and the mutual support of their peers. Summing up their experiences in the past four years, over 80% of students confirmed that the school had provided different opportunities for them to build a closer relationship with their counterparts and over 80% of students found that their relationship with their teachers had been maintained or even enhanced despite the pandemic. More than 80% of students appreciated the care of the School for their social well-being in the past four years. Similar positive results were yield in the APASOII</p>

survey conducted towards the end of the school's development cycle. Compared with the figures obtained 4 years ago, the negative affect of our students had dropped, while the scores for the social integration and teacher-student relationship had improved slightly.

Reflection

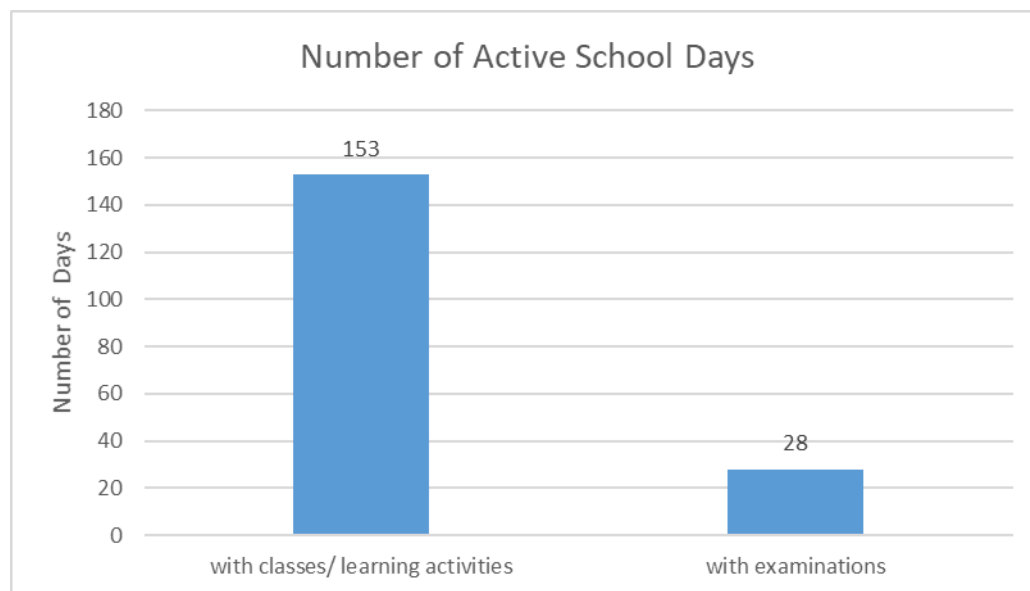

Given the vicissitudes in the external environment, it had been a challenging yet fruitful year for the School to help students sail against the current. With the comprehensive activities planned for students, a harmonious and positive learning environment had been cultivated. Positive values like gratitude, empathy, care for others, resilience, to name but a few, were fostered among students. The major concern and development goal were achieved as shown in the positive survey results. The School was committed to building positive values among students and caring for the whole person development of students. Values education would therefore be one of the emphasis in the next development cycle.
